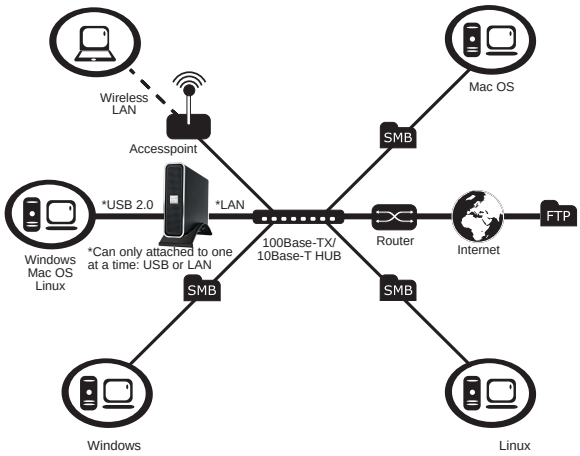
HDD Enclosure Serves Home Networks with Videos, Music, Printer Access and more

The ICY BOX IB-NAS903 is a quite versatile HDD enclosure. Connected to the port of a Wi-Fi router it serves any PC in the network with data from its HDD (not included). It comes with four servers to manage content in the network. Samba allows up to 16 users in the network. FTP is responsible for remote access via the Internet and the UP'n'P AV server enables an ICY BOX media player, an Xbox, PS3, a webradio like the Noxon or many other media players to stream pictures, music or videos from the HDD. Finally the DHCP server assigns an IP address for the NAS903 – if necessary.



Packing content: 1x IB-NAS903StU-B, 1x Software CD, 1x RJ-45 cable,1x USB cable, 1x wall power supply, 1x instruction manual
